AN PHAT HOLDINGS INTRODUCTION

Founded in 2002, having spent more than two decades of building and development with relentless efforts, An Phat Holdings has successfully grown from a small factory named Anh Hai Duy to a leading corporation in Southeast Asia in high-tech and environmentally friendly plastic. We have gradually affirmed our position in the market and achieved outstanding business achievements.

Up to now, An Phat Holdings has become a multi-sector business with 19 subsidiaries operating in the various fields: compostable compounds and products, packaging, engineering plastics and building material plastics, precision engineering and molding, raw materials and chemicals for plastic industry, industrial real estate, logistics and other services.

An Phat Holdings' products have been presented in 80 countries and territories such as the United States, Japan, Europe, Korea, Singapore, the United Arab Emirates, Taiwan, Philippines, etc.

OUR PRODUCTS

COMPOSTABLE COMPOUNDS & PRODUCTS

As a plastic company, An Phat Holdings anticipated the importance of investing in the development of environmentally sustainable products. An Phat Holdings' mission to reduce waste through compostable plastic products is central to its long-term environmental, sustainability and growth agenda.

Not only does An Phat Holdings customize end-use compostable products for its customers, but also produces bio-resin, removing an important input cost for development and production.

Our environmentally friendly products have attained certifications such as OK compost by TÜV, DIN Certco Compostable for EU market and BPI Compostable certificate of the United States.

Let's protect the planet with us.

COMPOSTABLE COMPOUNDS

Compostable materials' certificates.

BG1000

- A pure Polybutylene adipate-co-terephthalate (PBAT). It can be broken down by microorganisms into CO₂, H₂O, and high-quality organic fertilizers within 180 days under composting conditions without generating any poisonous gas. It is the main raw material for biodegradable plastic films which can help reduce white pollution.
- With properties similar to polyethylene (PE), BG1000 can be widely applied to the manufacturing of shopping bags, food packages, mulch films, garbage bags, etc.
- Certificate: DIN Certco EN13432 & BPI ASTM D6400

BG5000J

- A pure Polybutylene succinate (PBS)
- With high MI, and properties similar to polypropylene (PP), BG5000J is used for injection molding, coating.
- Certificate: DIN Certco EN13432 & BPI ASTM D6400

BG5000M

- A pure Polybutylene succinate (PBS)
- Properties similar to polypropylene (PP) low MI, BG5000M can replace PP for extrusion.
- Certificate: DIN Certco EN13432 & BPI ASTM D6400

CTR02

- Modified Biodegradable compound based on a blend of PBAT, PLA (Polylactic acid) and appropriate additives. CTR02 allows its final plastic products to possess both biological (biodegradable and compostable) and physical (printable, weldable, adjustable transparency, increased tear strength and elongation) advantages at the same time.
- CTR02 has been widely applied to various sectors, such as shopping bags, garbage bags, food packages, garment bags, courier bags, etc.
- Certificate: DIN Certco EN13432 & BPI ASTM D6400
- Usable on blown film equipment for LDPE

**CTR02-E**

- A kind of compound based on blend of Polybutylene adipate-co-terephthalate (PBAT) & Polylactic Acid (PLA) and Calcium carbonate (CaCO₃). This compound can reduce the product cost while still maintaining biodegradable and compostable properties.
- Application: Carrier bags, shopping bags
- Certificate: BPI ASTM D6400
- Usable on blown film equipment for LDPE

**CTR02-M**

- A kind of compound based on a blend of PBAT, PLA, and appropriate additives helps to increase the tear strength and elongation of finished products greatly. With its outstanding mechanical strength, CTR02-M meets properties needed for thin agricultural or horticultural film applications like mulch film, cover film, and others.
- CTR02-M is able to make very thin film, and printable, and CTR02-M is highly compatible with Color Masterbatch. With regard to black films intended for mulching, the black masterbatch should be added to CTR02-M.
- Certificate: BPI ASTM D6400 & TUV-OK biodegradable SOIL
- Usable on blown film equipment for LDPE

**BG4400**

- A kind of compound based on blend of Poly lactic Acid (PLA) and Biodegradable additives for making single-use tableware, rigid packaging, injection molding.
- Mostly biobased
- Usable on conventional plastics manufacturing machines
- Suitable for food contact
- Certificate: DIN Certco EN13432 and BPI ASTM D6400

**CTR04**

- A kind of compound based on blend of Polybutylene adipate-co-terephthalate (PBAT) and Thermoplastic Starch (TPS) derived from corn. CTR04's compostability properties and its high content of renewable material allow optimal organic waste management and reduce the environmental impact significantly.
- It is mainly used for the production of thin shopping bags for the retail sector, trash liners.
- Certificate: TUV OK COMPOST HOME
- Usable on blown film equipment for LDPE

**ANBIO S3**

- A kind of compound based on blend of Poly lactic Acid (PLA) and Biodegradable additives for making straws.
- Mostly biobased
- Usable on conventional plastics manufacturing machines
- Suitable for food contact
- Certificate: DIN Certco EN13432 and BPI ASTM D6400

**BG9000**

- A pure Polybutylene succinate (PBS)
- Properties similar to polypropylene (PP) low MI, BG5000M can replace PP for extrusion.
- Certificate: DIN Certco EN13432 & BPI ASTM D6400

**BG4800**

- A kind of compound made from PLA and impact modifier for 3D printing filament application.

**BIO MASTERBATCH (BIO HF)**

- The purpose is to reduce the cost of production of compostable bags. Highly compatible with compostable PBAT resin and compostable compound.
- The addition of Bio HF goes between 5 to 60% depend on the final application.

**APSLIPE2**

- A slip agent with PBAT as a carrier resin. This biodegradable agent is highly compatible with PBAT and PLA for the application of film blowing.
- The addition of Bio HF goes between 1 to 3% depend on the final application.

COMPOSTABLE PRODUCTS

Certificates for compostable products

FLAT BAGS ON ROLL

Thickness: 11 - 50 mic
Width: Customized
Length: Customized
Film Color: Natural / Transparent
Printed: 1 - 4 colors
***Dimensions, thickness, printing:** Customized

DOG POOP BAGS

Thickness: Customized
Width: Customized
Length: Customized
Film Color: Natural / Transparent
Printed: 1 - 4 colors
***Dimensions, thickness, printing:** Customized

FOOD BAGS

Thickness: 10 - 15 mic
Width: Customized
Length: Customized
Film Color: Natural / Transparent
Printed: 1 - 4 colors
Types: Flat bags on roll, T-shirt bags on roll
***Dimensions, thickness, printing:** Customized

T-SHIRT BAGS

Thickness: 14 - 50 mic
Width: Customized
Length: Customized
Film Color: Natural / Transparent
Printed: 1 - 4 colors
***Dimensions, thickness, printing:** Customized

GLOVES

Thickness: ≥ 21 mic
Packing: Loose or in block
Shelf life: 12 months (best used within 6 months)
Available colors: Transparent
Available sizes: M, L, XL

STRAWS

Diameter: 3 - 12 mm (Flexible straws: 4.2 / 4.8 mm)
Thickness: > 160 mic
Length: Customized
Shelf life: 12 months (best used within 6 months)
Available colors: White, Blue, Green, Wooden, Black
Suitable temperature: < 45°C

PACKAGING

Our factories are equipped with many high-tech CNC machines, grinding machines. We make your creative design becoming solid reality.

PLASTIC BAGS

SHOPPING BAGS / FASHION BAGS

Materials: HDPE/LDPE, Recycle, Compostable
Dimension, thickness, printing: Customized

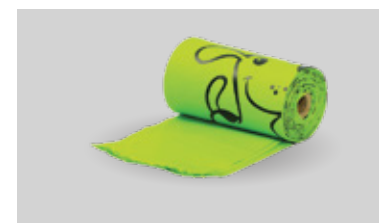

GARBAGE BAGS

Materials: HDPE/LDPE, Recycle, Compostable
Dimension, thickness, printing: Customized

FOOD BAGS

Materials: HDPE/LDPE, Recycle, Compostable
Dimension, thickness, printing: Customized

DOG POOP BAGS

Materials: HDPE/LDPE, Recycle, Compostable
Dimension, thickness, printing: 230x330mm, 15-20 mic (thickness)

ZIPPER BAGS

Materials: LDPE
Dimension, thickness, printing: Width: 100-500 mm
Length: 130-520 mm
Thickness: 40-100 mic

INDUSTRIAL BAGS

Materials: HDPE/LDPE, Compostable
Dimension, thickness, printing: Customized

LAMINATED BAGS

NON-FOOD CONSUMER FILM

FOOD FILM

VACUUM BAGS

I: COMMON THICKNESS OF FILM TYPES

PE	PET	MPET	PA	AL
30-175 mic	12 mic	12 mic	15 mic	6 mic

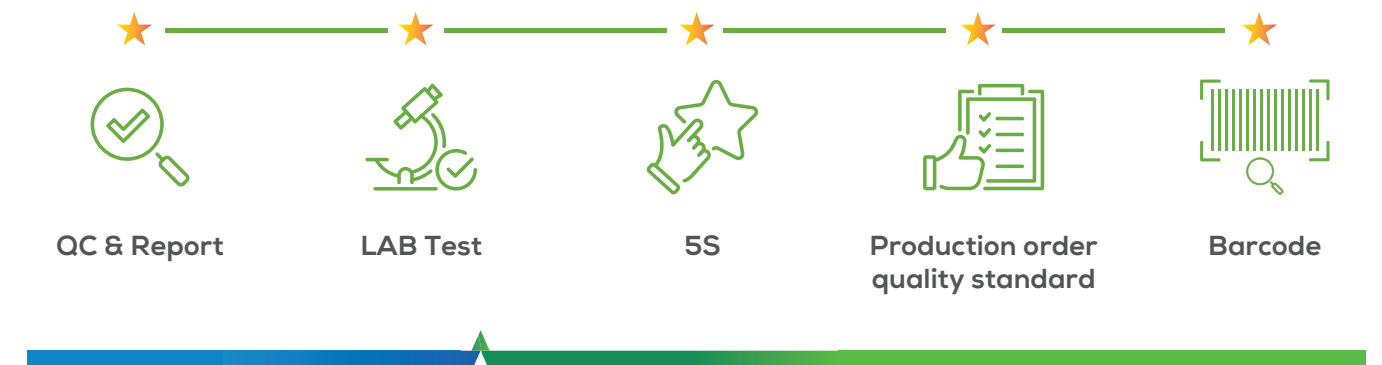

CPP	OPP	MOPP	MCPP	BOPP
Min 30 mic	20, 30, 40 mic	20, 30, 40 mic	Min 25 mic	Min 25 mic

INNER LAYER	MIDDLE LAYER	OUTER LAYER
PET, PA, OPP, MOPP	AL, MPET, MCPP	PE, CPP & MCPP

II: MAXIMUM FILM WIDTH FOR FINISHED PRODUCT MACHINES AND PRINTING INFORMATION

3-side-seal finished product machine (bag cutting machine)	Bag width: 75-580 mm
Printing information	Up to 9 colors printing

III: QUALITY CONTROL

FIBC

An Phat Holdings' Industrial Bag targets high demanding markets such as Japan, South Korea, the US and Europe; we always focus on the quality and features of products to bring our customers the highest satisfaction.

An Phat Holdings commits high environment protection by the standardized waste water treatment machinery.

Jumbo bag

Material: PP fabric, Mono and PP belt

Designs: Tubular, 4 panels, U panel, baffle, sift proof

Dimension: Customized

Sewing: lock and overlock

Type: A and B

Color: white, beige, black, green, blue, pink

SWL: from 300kgs to 3000kgs

SF 5:1

Hay Sleeve

Material: Woven PP fabric

Dimension: Customized

Small PP woven bag

Material: PP fabric

Dimension: Customized

Color: white, green

SWL: from 10kgs to 100kgs

PP woven roll

Material: PP fabric

Dimension: white, beige, blue, black, green

Belt

Material: PP and Mono yarn

Dimension: white, beige, blue, black, green

STRETCH FILM

Stretch films are made from highly stretchable material – LLDPE and are widely used for pallet and food wrapping. Based on requirements, An Thanh Bicsol Singapore can customize length, color, cardboard core and case pack of films.

Stretch film for pallets

Width (mm): 200-2000

Length (mm): Customized

Thickness (mic): 9-35 mic

Material: LLDPE

Film Color: Customized

Film structure: Multilayer (3-5 layers)

Card board core: Customized

Case Pack: Customized

Food wrap

Container load: Palletized/ Floor load

Certificate: ISO, SGS

Usage: Pallet wrap, food wrap

MOQ (tons): 3

Payment: TT/LC

Lead time: 3 days for 20ft, 5 days for a 40ft

C/O form: A, B, AI, AJ, AK, EAV, E, D, etc.

ENGINEERING PLASTICS

The member company of An Phat Holdings has a modern mold manufacturing factory in the plastic industry; on that basis, it has produced a wide range of high-tech plastic products, supplied to industrial and civil industries, meeting customers' needs.

The main products are electric and electronic components, auto and motorbike spare parts, air conditioner components, printer-fax, home electronics, etc., which are supplied to reputable global brands. In addition, we also have industrial containers, plastic pallets, and other plastic injection products.

OUR PARTNERS

Electric & electronic components
(Washing machine, television and printer, fax)

Parts for electronic & constructive industry

Motorbike spare parts

Auto spare parts

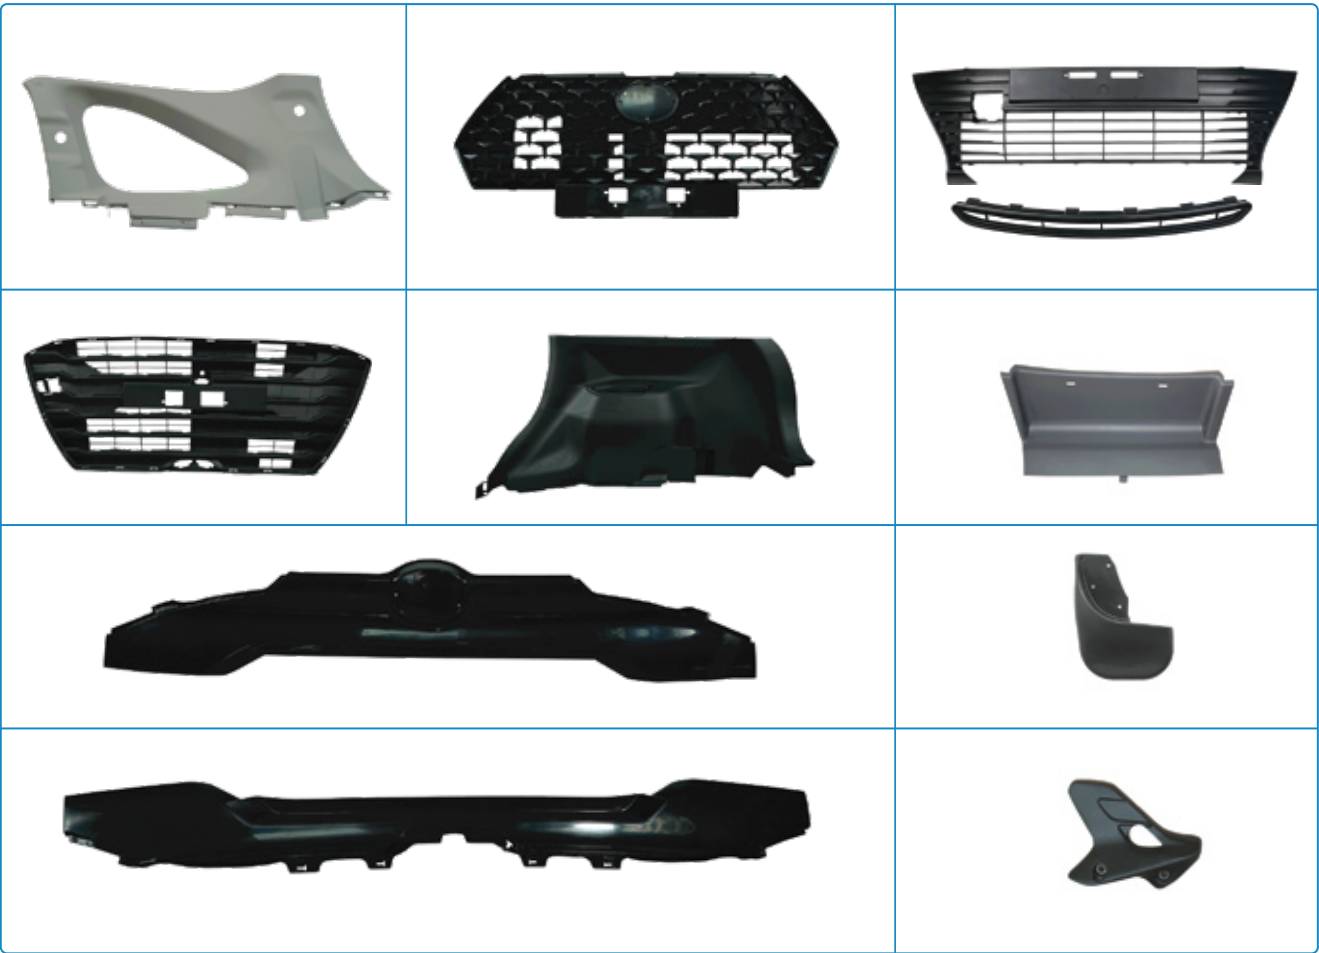

Horeca Products

ENGINEERING PLASTICS PRODUCTS

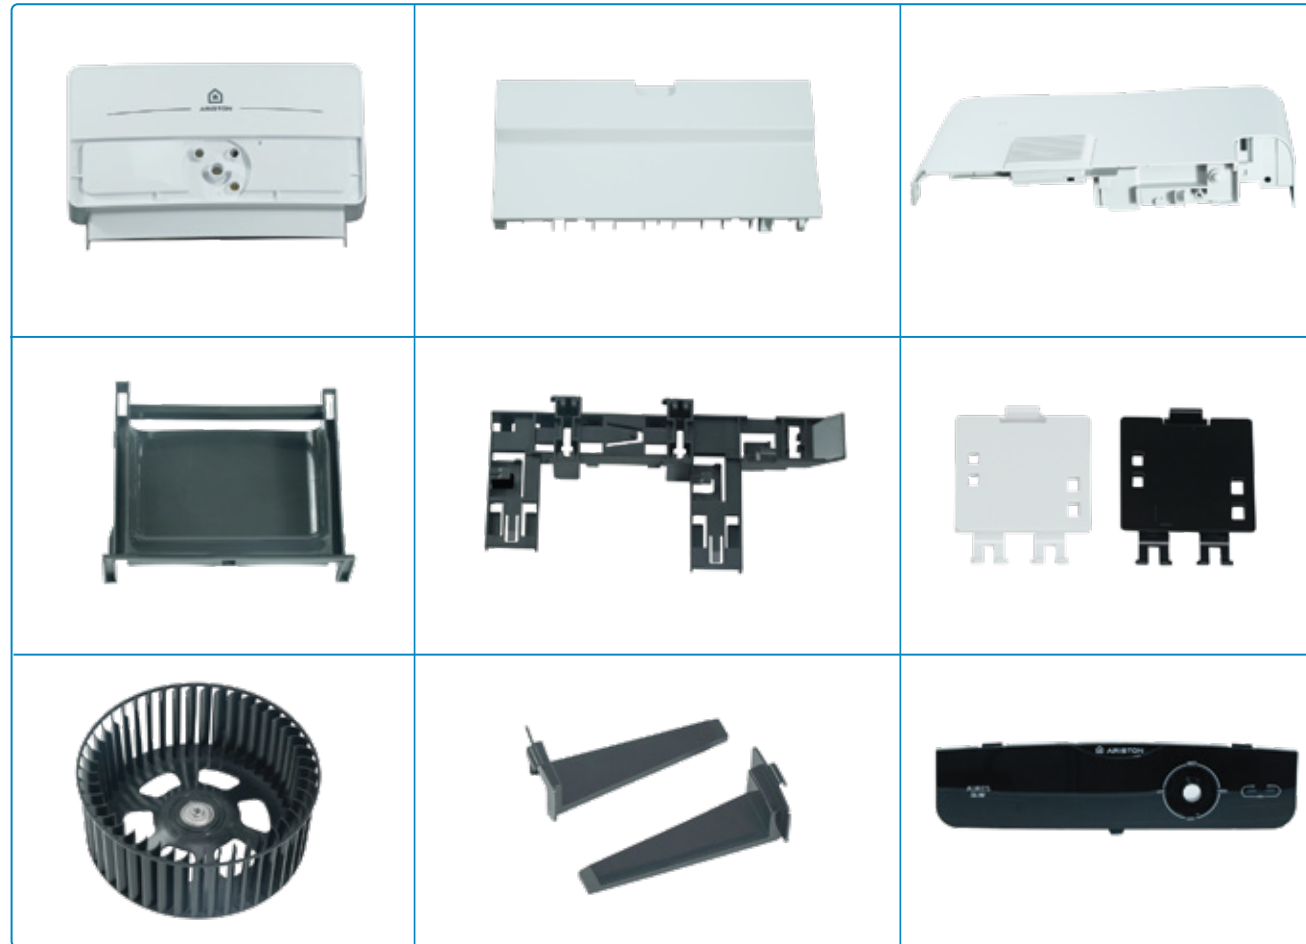

Automotive Parts

Motorcycle Parts

Home Appliances

Food Packaging Products

Plastic Pallets - Containers

Constructive Components

PRECISION MOLDING

An Phat Holdings has a subsidiary that specializes in manufacturing all kinds of molds, specialized equipment for technology and production of household and high-tech plastic products.

Taking the initiative to have a mold factory will help An Phat Holdings be proactive in designing, manufacturing, and manufacturing supporting components as well as being proactive in maintaining, shortening production time and costs.

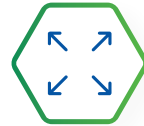

CAPACITY

HPC: **250 - 300 sets/year**
VMC: **280 - 320 sets/year**

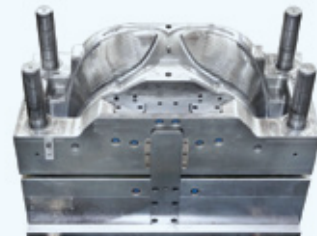

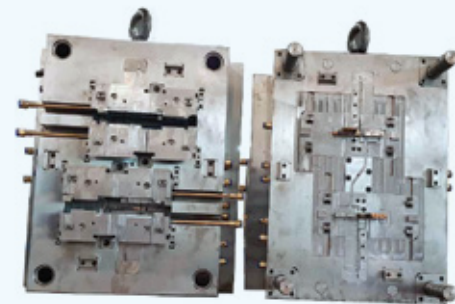

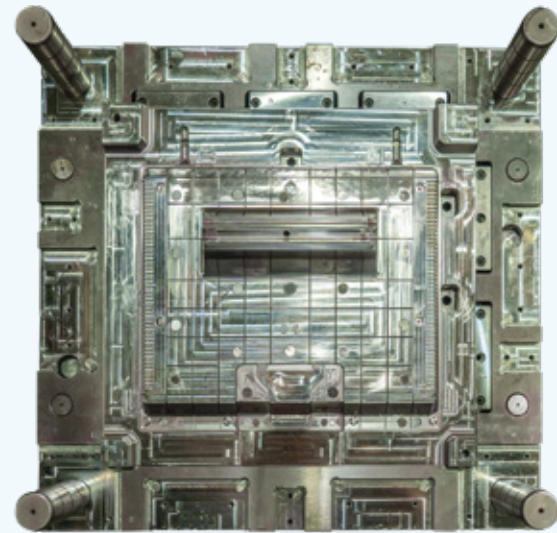

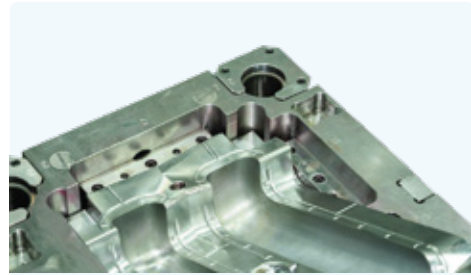

WEIGHT

30 tons

MAXIMUM SIZE

4500mm x 1900mm x 1500mm

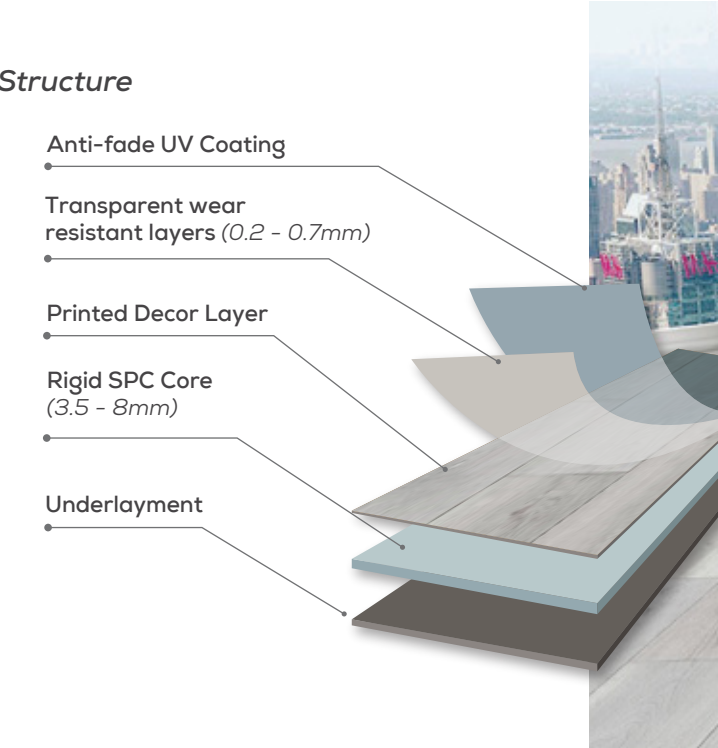

BUILDING MATERIAL PLASTIC PRODUCTS

With a production facility of 50,000 sqm and an annual capacity of 12.5 million sqm per year, An Phat Holdings is a professional manufacturer of high-tech building materials. Our products include SPC flooring, LVT glue-down, PVC wall and ceiling panels, accessories and other building materials.

SPC FLOORING

	mm	inch
Dimension (Customized)	1830x228	72"x9"
	1220x183	48"x7.2"
	1220x228	48"x9"
	1524x228	60"x9"
	900x450	35.43"x17.7"
	650x228	25.6"x9"
	610x305	24"x12"
	650x150	25.6"x5.9"
	600x120	23.6"x4.7"
Thickness	3.5 – 8.0mm (including wear layer)	
Wear layer	0.2 – 0.7mm	
Treatment	UV coating	
Texture	Wood grain/ EIR/ Marble grain	
Underlayment	1 - 1.5mm IXPE (black/ green)	
Locking System	UNILIN (Uniclic, Unidrop, Unizip)	
Edge Detail	Micro bevel 4 sides/ Painted bevel

Color

LVT FLOORING

LVT (Luxury Vinyl Tile) flooring is a modern adhesive floor covering. With its realistic simulation of materials like wood, stone, and tile, LVT flooring brings luxury and diversity to any interior space.

	mm	inch
Dimension (Customized)	914x152	36"x6"
	1220x178	48"x7"
	1220x152	48"x6"
	610x305	24"x12"
	610x122	24"x5"
Thickness	1.5-5mm (including wear layer)	
Wear layer	0.2 – 0.7mm	
Surface	UV coating (2 layers)	
Texture	Wood grain/ EIR/ Marble grain	
Edge Detail	Micro bevel 4 sides	

Anti-fade UV Coating

Reduces fading caused by sunlight near windows or in other indoor environments.

Transparent Wear Resistant Layer

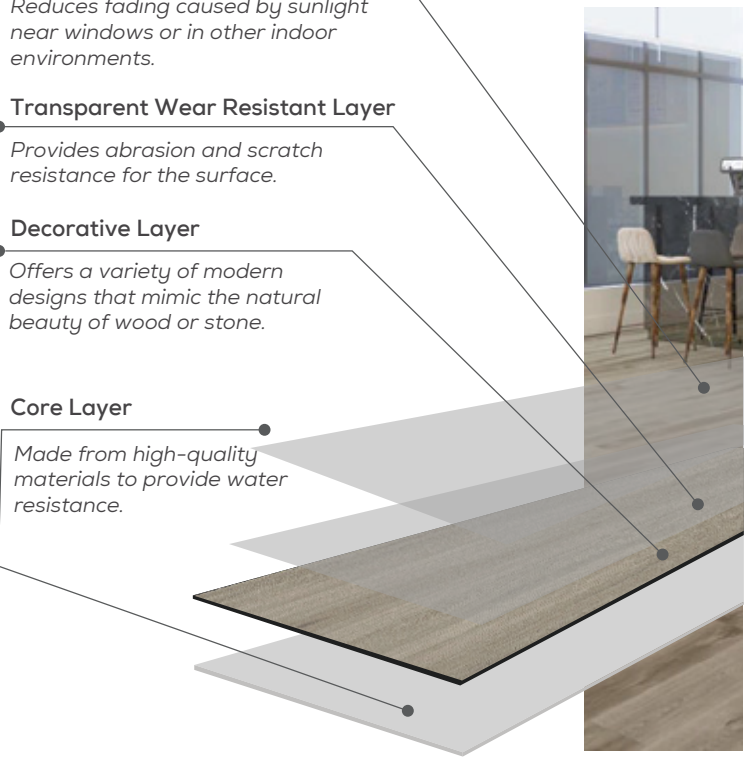

Provides abrasion and scratch resistance for the surface.

Decorative Layer

Offers a variety of modern designs that mimic the natural beauty of wood or stone.

Core Layer

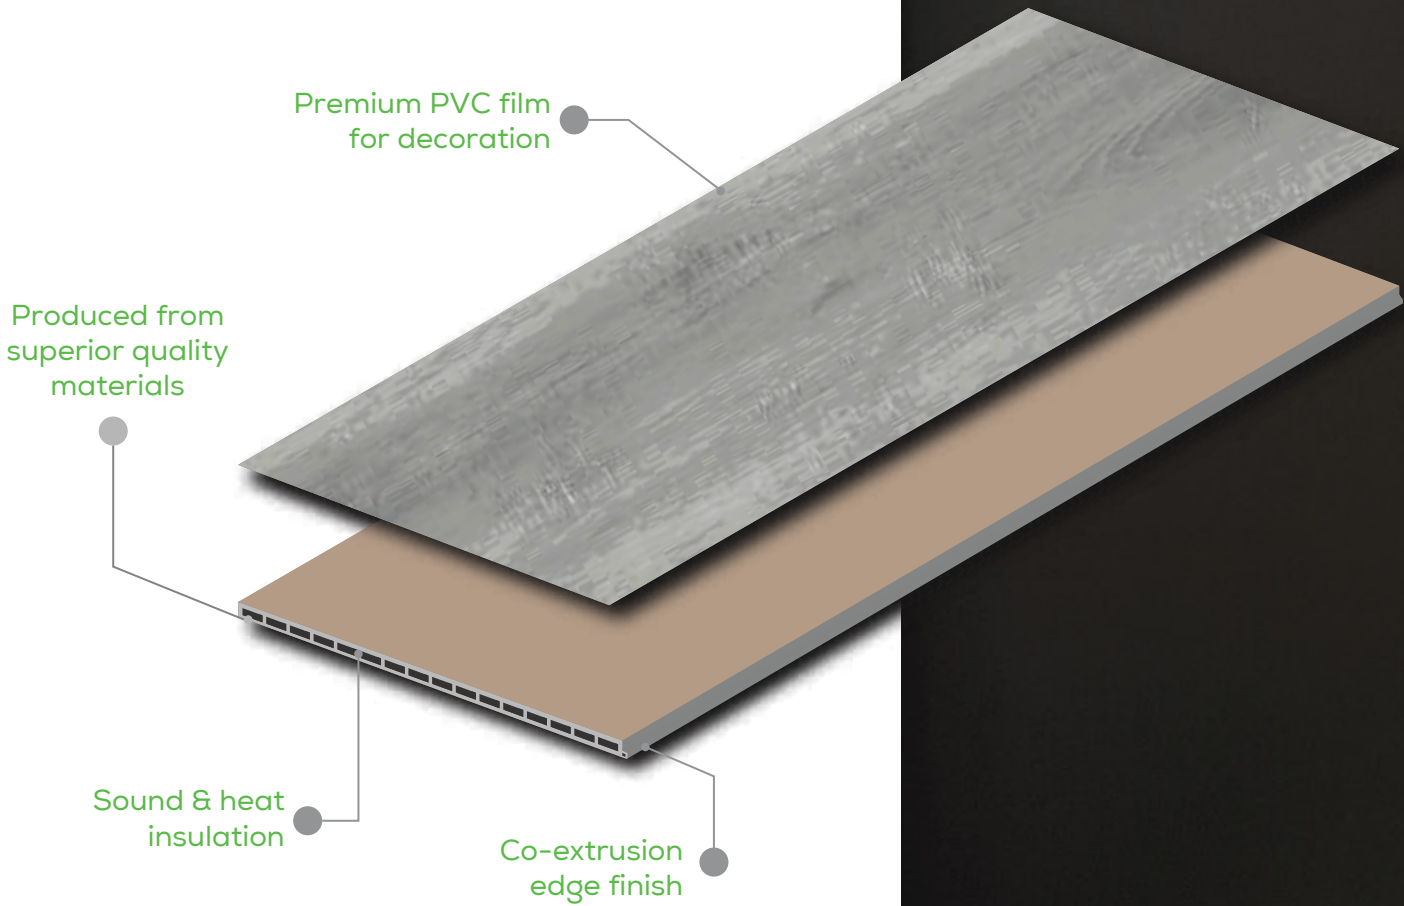

Made from high-quality materials to provide water resistance.

PVC WALL AND CEILING PANELS

Our PVC Wall and Ceiling Panels are tough, high durability and low maintenance compared to tiles or natural woods. Our products are a perfect choice for wet areas in rooms such as kitchens and basements because it is water-proof and mildew resistant.

Dimension	Length: 2900mm (Customized)
	Width: 400mm
Thickness	8.0mm
Surface	UV coating
Surface style	Wood / Décor paper / Stone

FEATURES

-  WATERPROOF AND DAMP-PROOF
-  FIRE RETARDANT
-  INSECTS, TERMITES RESISTANT
-  HIGH DURABILITY SOUND ABSORBANCE
-  EASY TO CLEAN

PET resins

OUR OWN REPACK BRAND - BICSOL

Bicsol's repack cover all categories of Polyethylene including HD/LLD/LD and is sold to various markets. We focus mostly on high quality PE made in USA and control closely on repacking process to ensure the best quality to customer.

CaCO₃ Filler Masterbatch

CaCO₃ Filler masterbatch in PE resin base

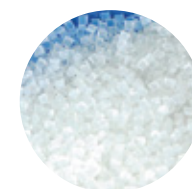

- **Blowing film:** PE film and bags
- **Injection molding:** furniture, food containers, water tanks
- **Extrusion:** HDPE pipe

CaCO₃ Filler masterbatch in PP resin based

- **Raffia:** PP woven, PP small bags, jumbo bags
- PP lamination
- PP non-woven
- PP injection and extrusion

TRANSPARENT MASTERBATCH

Transparent masterbatch BASO4/TALC

- For PE shopping bags & garbage bags, industrial films, packaging material & containers, etc. In general for injection, extrusion, film blown molding technology.

ADDITIVE MASTERBATCH

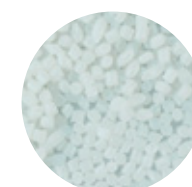

ANTI - UV masterbatch

- Excellent UV resistance to meet end use requirements
- Optimal balance between UV stability and long-term thermal stability
- Tailored products as per end use requirements
- Good processability

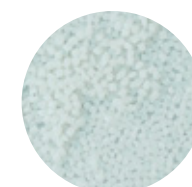

Antioxidant masterbatch

- Hll AO 11 is the combination of antioxidant additive in LLDPE carrier. It is used to protect polymers from degradation, both during processing and during use. The percentage of use of masterbatches is recommended at about 1-5%.

Anti-block masterbatch

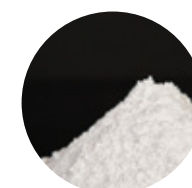

- Anti-block masterbatch is an additive masterbatch in PE resin based. This can give an advantage in end-use applications such as opening plastic bags.

Slip agent

- Slip agent is a combination of fatty acid amides in PE resin based. It's used to increase the gloss and smoothness of the film.

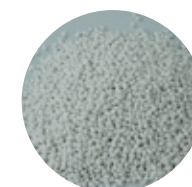

CALCIUM CARBONATE POWDER (CaCO₃)

Calcium Carbonate Powder (CaCO₃)

Superfine Calcium Carbonate Powder is manufactured from natural, white and pure limestone and calcium carbonate which has the best quality in Vietnam. An Tien Industries' coated and uncoated Calcium Carbonate powder having the highest whiteness and brightness is produced by the most advanced technology production lines.

WHITE COLOR MASTERBATCH

- It is widely used in shopping bags & garbage bags, industrial films, packaging material & containers, injection, extrusion, film blown molding technology.
